

## Your House Is Larger

at certain times than at others. You don't notice it, but it is. The surface of your house contracts with the cold and expands with the heat. If the paint on your house does not contract and expand with the surface it will crack. One should therefore be careful about the paint used.

## Blood Was Wrong

All women, who suffer from the aches and pains, due to female ailments, are urged to try Cardui, the reliable, scientific, tonic remedy, for women. Cardui acts promptly, yet gently, and without bad effects, on the womanly system, relieving pain, building up strength, regulating the system, and toning up the nerves. During the past half century, thousands of ladies have written to tell of the quick curative results they obtained, from the use of this well-known medicine.

## TAKE CARDUI the Woman's Tonic

Mrs. Jane Calhoun suffered from womanly trouble for nearly ten years. In a letter from Whiteville, N. C., she says: "I was not able to do my own housework. My stomach was weak, and my blood was wrong. I had backache, and was very weak. I tried several doctors, but they did me no good. I used Cardui for 3 or 4 months, and now I am in the best health I have ever been. I can never praise Cardui enough." It is the best tonic, for women.

Whether seriously sick, or simply weak, try Cardui.

## COTTON CONDITION VERY MUCH LOWER

Oklahoma and Texas Suffering for Want of Rain. South Carolina Crop Among Best.

New York, August 29.—Reports from 1939 special correspondents of the Journal of Commerce, bearing an average date of August 22, show a condition of cotton of 71.4 per cent, as compared with 81.1 per cent a month ago, or a loss of 9.7 points.

Only once in the past ten years has this decline in August been exceeded, namely, the year 1911, when it was 14.3 points; and the ten-year average loss is about 5.9 points.

Condition a year ago was 75.4 per cent, while in 1911, the banner year, it was 72.6 per cent, and 70.7 per cent in 1910.

The ten-year average is 73.5 per cent. It remains to be seen how far a loss of 9.7 points in conditions will be offset by an increase of \$56,000 acres over last year, or about 211-2 per cent.

Percentage condition by States follows:

Condition by States.	(1913)	Sept.
Sept. Aug. Diff. 1912 1911 1910		
N. Car.	78.2 79.3	*0.9 75.6 79.5 79.9
S. Car.	77.5 76.6	*0.9 74.0 74.8 74.0
Georgia	79.0 79.5	—0.5 71.5 80.6 71.0

Average	71.4 81.1	—9.7 75.4 72.6 70.7

Deterioration has been greatest in Texas, Oklahoma and Missouri, where continued drought and high temperatures were chiefly instrumental in causing declines of 15.7 points, 15.4 points and 19.8 points, respectively. Other important states showing losses were: Georgia 0.5 points; Alabama 5.6 points; Mississippi, 7.4 points; Louisiana 6 points; Arkansas 9.8 points; Tennessee 8.2 points.—News & Courier.

## Plate Glass Smashed.

One of the large plate glasses in the show windows of S. M. & E. H. Wilkes & Company's store was totally demolished during the wind and rain storm Friday evening. The large glass, which is eight feet high by fourteen feet long, was cracked during a wind storm several months ago and the big storm Friday evening put the finishing touches to it. Not a piece of glass a square foot in area was left to tell the tale. Several persons seeing the crash hurried through the opening and removed the furniture so that it would not be damaged by the rain. "Uncle" Jack Glenn was then put on guard to keep prowlers out during the night and he kept sentinel until Saturday morning, holding a continuous reception to questioners from soon after the accident until late in the night.

## HE WONDERS WHAT IT IS—THEN SUDDENLY FINDS OUT.

## Condense Your Hay

COARSE hay is one of the hardest things in the world to manage. There's no getting around that. The wind plays havoc with it. It slips and slides off poorly loaded wagons. In barn and yard much of it is wasted. It is much too bulky to haul or ship far.

Handling hay is a problem, and right here is the answer—in the baling. An I H C hay press puts your hay in convenient shape for handling and economical feeding; no need to build outdoor stacks exposed to all weather, for lack of barn space. You can ship the bales to cities and distant places where the hay market and prices are good. Large cities, where storage space is costly, require hay to be baled, and top prices are paid. Shredded corn fodder makes a good feeding substitute for all the hay you may ship to the city.

## I H C Hay Presses

are the only kind you will consider in buying, when you have made a comparison, studied the construction, the durability, the features, and the possibilities of the I H C hay presses. You will find both styles made in three sizes, 14 x 18, 16 x 18, and 17 x 22-inch bale chamber, baling from six to sixteen tons per day.

The efficiency of the I H C features, the self feeder, toggle joint plunger, bale tension, and spring roller tucker, prove their worth on demonstration. If your choice is a motor power press, you will have a year-round machine, for the engine is always ready to do farm jobs for you, pumping, sawing, grinding, running the repair shop, electric light plant, etc. In the horse power press, study the pull power principle, compound leverage, and the low step-over. It is the most efficient press sold.
